

Assured. Accurate.

THE RIGHT SYSTEMS

QualiTru Sampling Systems is committed to providing aseptic sampling systems that are the most trusted method for sample taking in all liquid processing industries. We are always innovating new technologies and products that will meet and exceed safety and regulatory requirements now and well into the future.

THE RIGHT SOLUTION, STANDARDS AND EQUIPMENT FOR ACCURATE SAMPLING.

QualiTru Sampling Systems offers a wide variety of products that allow safe and secure access to your fluid processing lines. These access points can be used to collect samples for a variety of applications.

- Dairy plants
- Dairy farms
- Milk haulers
- Breweries
- Water filtration
- Wineries
- Juice processors
- Egg processors
- Beverage processors
- Liquid food processors

Truly quality equipment

The future of sampling technology is being created now through QualiTru's on-going work and innovations that focus on the process of sampling to guarantee sample consistency. From laboratories and advanced manufacturing facilities, to extensive real world testing, QualiTru products are answering today's and tomorrow's needs of liquid processors around the globe.

TruStream Stainless Steel Sanitary Ports

Our ports are manufactured under rigorous quality control standards and are available in both 7- and 12-channel configurations. Custom ports can also be created for seamless integration with virtually any processing line.

TRUSTREAM

TruStream Sterile Septa

Our sterile septa are available in both 7- and 12-channel needle guides. Components from the septa that come in contact with your sample are made from food-grade contact materials. They allow for aseptic samples to be drawn a single time from each channel reducing the risk of cross contamination.

TruStream Sterile Collection Units

We provide a complete line of single-use, sterile, disposable collection units ranging from our TruDraw 2oz Single Sampler to our 7-Liter collection bags. Each TruStream collection bag includes tubing and needle as one unit.

STERILE FLUID PATH FOR ASEPTIC SAMPLING
DO NOT REUSE!

TRUDRAW®

TruDraw Single Sampler

The new, innovative TruDraw Single Sampler with tamper-evident feature is a sterilized, sealed container with an attached sterile needle to draw a sample in. This self-contained option virtually eliminates the risk of external contamination. The TruDraw is also ideal for simple, secure sample tracking of each individual container. Our TruDraw Single Sampler is designed to work with the TruStream sanitary ports and sterile septa.
